-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 9 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Phillips (USPN 3,208,643).

Phillips discloses a portable viscous fluid pump having an air tight tank (46) having an inlet manifold (11) mounted at a top portion thereof, an outlet (56) mounted at a lower end thereof, a valve (130) in the outlet and a hose (140). There is a waste gate (114) and a pressure gauge (128). Additionally there is a frame (16,18) with a handle (32) and wheels (14).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-8, 10-14 and 16-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Phillips in view of Raposo et al (2003/0079796).

As set forth above Phillips discloses the invention substantially as claimed but does not disclose the inlet manifold having the pressure gauge attached thereto. Raposo et al discloses a cement/mud pump having a tank with an inlet manifold (49) having a pressure gauge attached thereto. At the time of the invention it would have been obvious to one of ordinary skill in the art to attach the pressure gauge of Phillips to the inlet manifold as taught by Raposo et al as an equivalent pressure measuring arrangement which allows for compact design and fewer drilled holes or openings in the lid of Phillips.

### ***Conclusion***

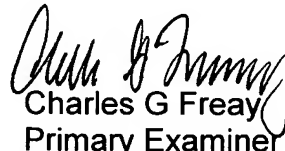

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McIntyre, Poole et al, Jurdye and Brandbo disclose air driven tank pumping systems.
